Nour Eldeen Mahmoud Okbi

Full-Stack Developer (.NET & React)

nourokbi1@gmail.com | +20 111 716 1123 | linkedin.com/in/nourokbi | github.com/nourokbi
Cairo, Egypt

Summary

Full-stack developer with a strong background in frontend development using React and TypeScript, and growing experience in backend development with **ASP.NET Core** and **Entity Framework Core**.
I enjoy building complete web applications, from designing responsive user interfaces to developing APIs and working with databases. I focus on writing clean, maintainable code and understanding how different parts of a system work together. Currently, I'm continuing to improve my backend skills and deepen my knowledge of scalable application design.

Experience

- **GIS Trainee Intern @ ITI** Jul 2025 – Dec 2025
  Information Technology Institute (ITI) *Giza, Egypt*
  - Developed responsive web applications using **React** and **TypeScript**.
  - Built interactive and data-driven UI components using **Leaflet.js** and **ArcGIS JS SDK**.
  - Integrated REST APIs to deliver dynamic and real-time content.
  - Converted UI designs into scalable and reusable component-based architectures.
  - Collaborated in debugging, testing, and delivering production-ready features.

Skills

- **Backend:** ASP.NET Core Web API, Entity Framework Core, JWT Authentication, RESTful APIs, Node.js, Express.js
- **Databases:** PostgreSQL (Neon), SQLite, SQL Server (Basics), Supabase
- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, Responsive Design
- **Frameworks & Libraries:** React, Next.js, Tailwind CSS, HeroUI, Chart.js
- **Programming Languages:** C#, JavaScript, TypeScript, Python, SQL
- **Core Concepts:** OOP, Dependency Injection, API Design, Authentication/Authorization, CRUD Operations, Client-Server Architecture
- **Tools & Workflow:** Git, GitHub, Postman, Swagger/OpenAPI, Vercel, npm
- **GIS (Bonus):** Leaflet.js, ArcGIS JS SDK, ArcGIS Pro, QGIS

Projects

- **Habit Circle** | ***ASP.NET Core, EF Core, PostgreSQL (Neon), JWT***
  - Built an **ASP.NET Core Web API** with **JWT authentication** and persisted data using **EF Core** + **PostgreSQL (Neon)**.
  - Implemented join-by-code circles and habit sharing with members-only visibility, enforcing authorization rules server-side.
  - Modeled habits (daily/weekly/monthly) and check-ins, with endpoints for logging completions and viewing history.
- **ArcadeShelf** | ***ASP.NET Core, EF Core, React, TypeScript***

- Built a full-stack application to manage a collection of games using **ASP.NET Core Minimal APIs** and **React**.
- Designed RESTful APIs implementing CRUD operations with **Entity Framework Core** and **SQLite**, with clean separation of concerns (API, data access, and models).
- Integrated frontend and backend using environment-based API configuration, and implemented UI features such as table/card views, multi-select deletion, and persistent preferences.

- **Floods Insights** | ***React, JavaScript, Chart.js, ArcGIS*** https://floods-insights.vercel.app/
  - Developed a data-driven web application with interactive maps and dynamic dashboards.
  - Integrated multiple APIs to visualize real-time and historical geospatial data.
  - Implemented advanced UI features, including map controls, search, and export functionality.
- **United Nations Climate Adaptation Platform** | ***React, Leaflet, HeroUI***
  - Built an interactive dashboard with geospatial data layers and a responsive UI.
  - Focused on usability, accessibility, and scalable frontend architecture.
  - Implemented reusable map components and UI state for working with geospatial layers.
- **IP Address Tracker** | ***React, Leaflet*** https://ip-tracker-two-theta.vercel.app/
  - Developed a real-time IP tracking application with map visualization and API integration.
  - Built reusable components and implemented persistent UI preferences.
  - Improved reliability with input validation and error handling around geolocation API responses.

Education

- **Faculty of Computers and Artificial Intelligence, Cairo University** Cairo, Egypt
  Bachelor's Degree in Computer Science *2020 – 2024*
  - Studied software engineering, database systems, and system design.
  - Completed coursework in machine learning, artificial intelligence, and data modeling.
  - Built projects across web, mobile, and data-driven applications.

Certificates

- ICC Certificate in GIS – Information Technology Institute (ITI)
- ESRI Certificates – ArcGIS JavaScript SDK & ArcGIS Python API
- Advanced React Certificate – Scrimba
- Front-End Development Workshop – Google DSC
